DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a method of a color format conversion, classified in class 348, subclass 488.
 - II. Claims 12-24, drawn to an image processor for a camera module, classified in class 348, subclass 222.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another and materially different apparatus such as a scanner and the apparatus as claimed can be used to practice another and materially different process such as color correction or communication with other devices.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to the attorney on March 18, 2004 to request an oral election to the above restriction requirement, but did not result in an election being

made. Examiner attempted to service the restriction requirements to the attorney by phone, however the call did not go through.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
